Status: Customer Info Received
Applicant: Cascadia Ridge Resiliency LLC
Title: CASCADIA RIDGE BESS FLOODPLAIN DEVELOPMENT PERMIT
Description: The purpose of this Floodplain Development Permit application is limited to evaluating whether future geotechnical investigation activities, if separately authorized, could occur within the floodplain in compliance with applicable floodplain regulations. The applicant has identified a conceptual 2,400-foot linear access alignment for potential future access by geotechnical boring equipment and support vehicles. This conceptual alignment is provided solely for floodplain impact evaluation and does not authorize tree removal, clearing, grading, stump removal, road construction, or other land-disturbing activities. Any such activities, including vegetation removal or site access improvements, would require separate permit review and approval, including any applicable SEPA and critical areas review, prior to commencement.
